DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1 – 5 and 37 in Paper No. 3 is acknowledged. The traversal is on the ground(s) that it does not meet the requirements of MPEP 806.05(c). This is not found persuasive because the restriction requirement does meet the MPEP requirements.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 – 5 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zavracky et al. in view of Fitch et al. and Van Zeghbroeck.

4. Zavracky et al. show a three dimensional structure (see Figure 14 and column 5, line 34) with SOI structures and show the use of fiber optic interconnects (column 12, line 39). Fitch et al. show a stacked structure where the stack units are SOS (see column 3, line 55 and column 7, line 31). It would be obvious to replace the SOI with SOS as a design alternative. Van Zeghbroeck shows the details of a fiber optic coupling which specifically shows a perpendicular fiber mounting and it would have been obvious to use the Van Zeghbroeck technique in the Zavracky et al. device to provide details which are not described there.
